

THE CHINESE GEOLOGIC DATA NETWORK OF WDCD

Dai, Aide Geologic Data Center, Chinese Academy of Geological Sciences, Beijing 100037, CHINA.

Chinese Geologic Data Network is a science data networks of World Data Center D for Geology (WDCD Geology). The WWW Web ([http:// www.wdcdgdc.org](http://www.wdcdgdc.org)) is established in 1998. The aim of the network is providing the platform and channel issued, exchanges and enjoys together the geology science data for geologists, and promotes learning exchange and the cooperation for whole world geologist. The major function of the data network is the data navigation for China geological data, include: WDCD system, Chinese geoscience organization, Chinese geology database, GIS technique application, Chinese geologic map and photograph, and Chinese geologist, etc. The geology science data issued, for example: geology, mineral resources, hydrogeology, disaster geology, environment geology and geologic map etc. The communication address that whole world geologist has been employed at this web, Chinese geoscience organization post address or email address, or web. The major information of the web is the storage in web's database. By ASP technique, the dynamic search and retrieval to these realize data of user.
